NEW QUESTION: 2 Choose what BEST describes a Session. **A.** Sessions locks the policy package for editing. **B.** Sessions ends when policy is pushed to the Security Gateway. **C.** Starts when an Administrator logs in to the Security Management Server through SmartConsole and ends when it is published. **D.** Starts when an Administrator publishes all the changes made on SmartConsole. **Answer: C** Explanation: Explanation Administrator Collaboration More than one administrator can connect to the Security Management Server at the same time. Every administrator has their own username, and works in a session that is independent of the other administrators. When an administrator logs in to the Security Management Server through SmartConsole, a new editing session starts. The changes that the administrator makes during the session are only available to that administrator. Other administrators see a lock icon on object and rules that are being edited. To make changes available to all administrators, and to unlock the objects and rules that are being edited, the administrator must publish the session.
