NEW QUESTION: 3 Which of the following is the MAIN objective in contracting with an external company to perform penetration testing?
A. To receive an independent view of security exposures
B. To mitigate technical risks
C. To identify a complete list of vulnerabilities
D. To have an independent certification of network security
Answer: A
Explanation: Even though the organization may have the capability to perform penetration testing with internal resources, third-party penetration testing should be performed to gain an independent view of the security exposure. Mitigating technical risks is not a direct result of a penetration test. A penetration test would not provide certification of network security nor provide a complete list of vulnerabilities.
