NEW QUESTION: 2You work as a Network Administrator for uCertify Inc. The company has a TCP/IP based network. You have segmented the network in multiple sub networks. Which of the following advantages will you get after segmentation?Each correct answer represents a complete solution. Choose three.**A.** Reduced congestion**B.** Improved security**C.** Reduced performance**D.** Limited network problems**Answer: A,B,D**Explanation:Network segmentation in computer networking is the act or profession of splitting a computer network into subnetworks, each being a network segment or network layer. The advantages of such splitting are primarily for boosting performance and improving security. Advantages:Reduced congestion: Improved performance is achieved because on a segmented network, there are fewer hosts per subnetwork, thus minimizing local traffic.Improved security: Broadcasts will be

contained to the local network. Internal network structure will not be visible from outside.
Containing network problems: It limits the effect of local failures on other parts of the network.
