NEW QUESTION: 1 Refer to the exhibit. ICMP Echo requests from host A are not reaching the intended destination on host B. What is the problem? **A.** The link is congested. **B.** The packet is dropped at the next hop. **C.** The ICMP payload is malformed. **D.** The ICMP Identifier (BE) is invalid. **E.** The negotiation of the connection failed. **Answer: B**

NEW QUESTION: 2 A company hosts multiple externally facing applications, each isolated in its own AWS account. The company's Security team has enabled AWS WAF, AWS Config, and Amazon GuardDuty on all accounts. The company's Operations team has also joined all of the accounts to AWS Organizations and established centralized logging for CloudTrail, AWS Config, and GuardDuty. The company wants the Security team to take a reactive remediation in one account, and automate implementing this remediation as proactive prevention in all the other accounts. How should the Security team accomplish this? **A.** Use AWS Shield Advanced to identify threats in each individual account and then apply the account-based protections to all other accounts through Organizations. **B.** Use GuardDuty alerts to write an AWS Lambda function that updates all accounts by adding additional NACLs on the Amazon EC2 instances to block known malicious IP addresses. **C.** Use GuardDuty centralized logging and Amazon SNS to set up alerts to notify all application teams of security incidents. **D.** Update the AWS WAF rules in the affected account and use AWS Firewall Manager to push updated AWS WAF rules across all other accounts. **Answer: B**

NEW QUESTION: 3 A magazine currently has a circulation of 500,000 copies per year at a price of \$5 per copy. Following a market survey it has been suggested that the price of each copy should be reduced to \$4.50. It is expected this will lead to an increase in circulation of 25,000 copies per year. What is the price elasticity of demand of the magazine? **Answer:** Explanation: 0.5
