**NEW QUESTION: 1**What does HP ALM eliminate?**A.** silos, manual testing, the need for automation**B.** clusters, clouds, brute force**C.** manual testing, collaboration, war room meetings**D.** islands, point tools, brute force**Answer: D****Explanation:**  
Reference:<http://www.slideshare.net/HPSoftwarePolska/hp-application-lifecycleintelligence-13725723>

**NEW QUESTION: 2**Which of the following vulnerabilities can lead to unexpected system behavior, including the bypassing of security controls, due to differences between the time of commitment and the time of execution?**A.** Buffer overflow**B.** Pointer dereference**C.** DLL injection**D.** Race condition**Answer: B****Explanation:**ExplanationBuffer overflow protection is any of various techniques used during software development to enhance the security of executable programs by detecting on stack-allocated variables, and preventing them from causing program misbehavior or from becoming serious security vulnerabilities.DLL injection is a technique which to run arbitrary code in the context of the address space of another process. If this process is running with excessive privileges then it could be abused by an attacker in order to execute malicious code in the form of a DLL file in order to elevate privileges.

**NEW QUESTION: 3**You have been assigned a project to develop a Web site for a construction company. You plan to develop a Web site and want to use cascading style sheets (CSS) as it helps you to get more control over the appearance and presentation of your Web pages and also extends your ability to precisely specify the position and appearance of the elements on a page and create special effects. You want to define styles for individual elements of a page. Which type of style sheet will you use?**A.** Embedded Style Sheet**B.** Inline Style Sheet**C.** External Style Sheet**D.** Internal Style Sheet**Answer: B****Explanation:**Explanation/Reference:Explanation: Cascading style sheets (CSS) are used so that the Web site authors can exercise greater control on the appearance and presentation of their Web pages. And also because they increase the ability to precisely point to the location and look of elements on a Web page and help in creating special effects. Cascading Style Sheets have codes, which are interpreted and applied by the browser on to the Web pages and their elements. There are three types of cascading style sheets.External Style SheetsEmbedded Style SheetsInline Style SheetsExternal Style Sheets are used whenever consistency in style is required throughout a Web site. A typical external style sheet uses a .css file extension, which can be edited using a text editor such as a Notepad.Embedded Style Sheets are used for defining styles for an active page.Inline Style Sheets are used for defining individual elements of a page.Reference: TechNet, Contents:
