And Estruturit can guarantee your Fortinet certification NSE4_FGT-7.2 exam to be qualified, With NSE4_FGT-7.2 study braindumps, learning from day and night will never happen.

NEW QUESTION: 1What are the three PRIMARY steps to be taken to initialize the project?Each correct answer represents a complete solution. Choose all that apply.**A.** Acquire software**B.** Plan risk management**C.** Define requirements**D.** Conduct a feasibility study**Answer: A,C,D**
Explanation:Explanation/Reference:Explanation:Projects are initiated by sponsors who gather the information required to gain approval for the project to be created. Information often compiled into the terms of a project charter includes the objective of the project, business case and problem statement, stakeholders in the system to be produced, and project manager and sponsor.Following are the steps to initiate the project:Conduct a feasibility study: Feasibility study starts once initial approval has been given to move forwardwith a project, and includes an analysis to clearly define the need and to identify alternatives for addressing the need. A feasibility study involves:- Analyzing the benefits and solutions for the identified problem area- Development of a business case that states the strategic benefits of implementing the system either in productivity gains or in future cost avoidance and identifies and quantifies the cost savings of the new system.- Estimation of a payback schedule for the cost incurred in implementing the system or shows the projected return on investment (ROI) Define requirements: Requirements include:- Business requirements containing descriptions of what a system should do- Functional requirements and use case models describing how users will interact with a system- Technical requirements and design specifications and coding specifications describing how the system will interact, conditions under which the system will operate and the information criteria the system should meet.Acquire software: Acquiring software involves building new or modifying existing hardware or softwareafter final approval by the stakeholder, which is not a phase in the standard SDLC process. If a decision was reached to acquire rather than develop software, this task should occur after defining requirements.Incorrect Answers:D: Risk management is planned latter in project development process, and not during initialization.

NEW QUESTION: 2

あなたの顧客は、今後のデータの流入をサポートするための新しいストレージソリューションを探しています。同社は、冗長で手動のプロセスに費やす時間を減らす必要がありますが、予算が限られており、多額の資本支出を行うことはできません。この顧客と話すとき、どの解決策を強調しますか。（2つ選んでください。） **A.** HPE Recovery Manager Centralからのデータセキュリティとバックアップ**B.** HPE InfoSightのAI駆動オートメーション**C.** HPE OneSphereからのマルチクラウド管理と洞察**D.** HP GreenLake Flex Capacityの使用単価モデル**E.** HPE Cloud VolumesとHPE Cloud Bankストレージからのネイティブクラウド統合**Answer: B,D**

NEW QUESTION: 3NSX

Managerへの接続を検証するために、ESXIトランスポートノードで使用できる2つのコマンドはど

れですか？（2つ選択してください。） **A.** esxcli network ip connection list | grep rabbitmq **B.** nsxcli --cmd get managers **C.** nsxcli --cmd get manager connectivity status **D.** nsxcli --cmd get manager status **E.** esxcli network ip connection list | grep 5671 **Answer: A,E**
