We always put the demand of customers as the first place.

NEW QUESTION: 1 A financial institution engaged in mortgage lending has embarked on a business process improvement initiative to eliminate the activities that hinder growth to ultimately improve the success rate of its mortgage business. As a benchmark for identification, the institution is keen on improving any business process that has less than a 75% success rate. The institution has appointed a business analyst (BA) to review the business transactions for the processes of origination, payments, and closures, as well as identify opportunities for improvements and recommend solutions. The BA has collected the following information over the last three months pertaining to these business processes: *All the business processes are at their maximum capacity in terms of the current number of transactions. *Each business process has a certain number of rejects and the reasons for rejection include documentation, verification, collateral, and funding. Funding rejects occur when the bank's customers have failed to make payment of their mortgage processing fee or mortgage closure payment. The BA has also recommended the use of documentation checklists as a solution to eliminate the documentation rejects. If an additional recommendation to reduce Verification Rejects by 50% were to be introduced into the mortgage origination process, what is the potential success rate of the mortgage origination process? **A. 83% B. 74% C. 70% D. 86%** **Answer: B**

NEW QUESTION: 2 **A. Option B B. Option D C. Option C D. Option A E. A. Option A B. Option B C. Option C D. Option D** **Answer: D** Explanation: A read-only domain controller (RODC) is a new type of domain controller in the Windows Server@ 2008 operating system. With an RODC, organizations can easily deploy a domain controller in locations where physical security cannot be guaranteed. An RODC hosts read-only partitions of the Active Directory@ Domain Services (AD DS) database.
