Our products will live up to your expectations.

NEW QUESTION: 1You plan to deploy SQL Server 2014.You identify the following security requirements for the deployment:* Users must be prevented from intercepting and reading the T-SQL statements sent from the clients to the database engine.* All database files and log files must be encrypted if the files are moved to another disk on another server.You need to identify which feature meets each security requirement. The solution must minimize processor overhead.Which features should you identify? To answer, drag the appropriate feature to the correct requirement in the answer area.**Answer:** Explanation:Explanation- Secure Sockets Layer (SSL) encryption enables transmitting encrypted data across the network between an instance of SQL Server and a client application.- Transparent data encryption (TDE) performs real-time I/O encryption and decryption of the data and log files.

NEW QUESTION: 2A hospital plans to deploy a new instance of Dynamics 365 Finance. New users are created regularly. You must add all employees as users of the system and assign the appropriate role to users. Employees who have the initials M.D. after their name must be added to the Medical Doctors role. You schedule the automatic role assignment batch job. You need to complete the role assignment. What should you do?**A.** Select a user who has M.D. in the name. Assign the Medical Doctors role. Repeat for each user.**B.** Create a role with extended data security and assign it to the M.D. employees.**C.** Add a rule with a query to add employees with M.D. initials to the Medical Doctors role.**D.** Configure segregation of duties for the M.D. roles.

Answer: B

NEW QUESTION: 3A large manufacturing company sells a range of products. Details of one of these products are as follows.Each completed batch is delivered immediately in full to the one customer that purchases this product.The delivery vehicle is currently only 50% full when it makes these deliveries. The customer will accept deliveries of any size.Managers are considering changing the production batch size to 150 units.Increased material storage would be needed; this can be rented nearby at a cost of \$1,500 per month.The additional storage facility would enable an increase in the reorder quantity for the materials. As a result a 5% discount would be received on all materials purchased.Using direct product profitability (DPP), what will be the monthly profit attributable to the product if the production batch size is changed to 150 units?Give your answer to the nearest whole \$.**Answer:** Explanation:\$23780
