Normally we can make sure our C1000-187 exam dumps contain 75%-80% exam questions & answers of the IBM watsonx Mainframe Modernization Architect v1 - Associate real test, Don't leave your fate depending on thick books about the exam.

Do you want to obtain the certification?

NEW QUESTION: 1 A company has an application where reading objects from Amazon S3 is based on the type of user. The user types are registered user and guest user. The company has 25,000 users and is growing. Information is pulled from an S3 bucket depending on the user type. Which approaches are recommended to provide access to both user types? (Select TWO.)
A. Use Amazon Cognito to provide access using authenticated and unauthenticated roles
B. Provide a different access key and secret access key in the application code for registered users and guest users to provide read access to the objects
C. Use the AWS IAM service and let the application assume the different roles using the AWS Security Token Service (AWS STS) AssumeRole action depending on the type of user and provide read access to Amazon S3 using the assumed role
D. Use S3 bucket policies to restrict read access to specific IAM users
E. Create a new IAM user for each user and grant read access.
Answer: A, B

NEW QUESTION: 2 Which of the following is the PRIMARY purpose of information governance?
A. To ensure regulatory compliance is maintained while optimizing the utilization of information
B. To set direction for information management capabilities through prioritization and decision making
C. To monitor the processes that deliver and enhance the value of information assets
D. To develop control procedures that help ensure information is adequately protected throughout its life cycle
Answer: D

NEW QUESTION: 3 An Okta Administrator needs to ensure that all remote contractors are prompted for multifactor authentication (MFA) when they attempt to log in to Okta. Is this a step the administrator should take to meet this requirement? Solution: Implement Single Sign-On (SSO) at login
A. Yes
B. No
Answer: A

NEW QUESTION: 4 A large chain of shops with electronic funds transfer (EFT) at point-of-sale devices has a central communications processor for connecting to the banking network. Which of the following is the BEST disaster recovery plan for the communications processor?
A. Alternative standby processor onsite
B. Installation of duplex communication links
C. Alternative standby processor at another network node
D. Offsite storage of daily backups
Answer: C
Explanation: Explanation/Reference: Explanation: Having an alternative standby processor at another network node would be the best solution. The unavailability of the central communications processor would disrupt all access to the banking network, resulting in the disruption of operations for all of the shops. This could be caused by failure of equipment, power or communications. Offsite storage of backups would not help, since EFT tends to be an online process and offsite storage will not replace the dysfunctional processor. The provision of

an alternate processor onsite would be fine if it were an equipment problem, but would not help in the case of a power outage, installation of duplex communication links would be most appropriate if it were only the communication link that failed.
