NEW QUESTION: 1What is the key business challenge that drives the need for tight and real-time control over the application development, test, and release cycle?**A.** Businesses require up-to-date information regarding intellectual property and attrition.**B.** An agile and modern world requires modernized and fast applications.**C.** Mobile computing is growing rapidly and must be managed effectively.**D.** Ongoing business events, such as M&A and creation of new lines of business, highlight the inadequacy of a one-time portfolio assessment or limited project management processes.**Answer: D**

NEW QUESTION: 2**A.** Option **A**. Option **B**. Option **C**. Option **D****Answer: B**Explanation:AWS Identity and Access Management is a web service which allows organizations to manage users and user permissions for various AWS services. The user can add conditions as a part of the IAM policies. The condition can be set on AWS Tags, Time, and Client IP as well as on many other parameters. If the organization wants the user to access only from a specific IP range, they should set an IAM policy condition which denies access when the IP is not in a certain range. E.g. The sample policy given below denies all traffic when the IP is not in a certain range.

```
"Statement": [{"Effect": "Deny", "Action": "*", "Resource": "*", "Condition": {"NotIpAddress": {"aws:SourceIp": ["10.10.10.0/24", "20.20.30.0/24"]}}}]
```
