You can check your email and download the latest Fortinet NSE7_OT5-7.2 vce torrent, The high quality and efficiency of NSE7_OT5-7.2 test guide has been recognized by users.

RECENTLY UPDATED Fortinet EXAM DUMPS.

NEW QUESTION: 1An average of 90% is needed on five tests to receive an A in a class. If a student received scores of 95,85, 88, and 84 on the first four tests, what score will the student need to achieve on the fifth test to get an A?**A. 0B. 1C. 2D. 3E. 4****Answer: A****Explanation:** Explanation/Reference:Explanation:An average of 90% is needed of a total of 500 points: $500 \times 0.90 = 450$, so 450 points are needed. Add all the other test scores together: $95 + 85 + 88 + 84 = 352$. Now subtract that total from the total needed, in order to see what score the student must make to reach 90%: $450 - 352 = 98$.

NEW QUESTION: 2A technician replaces a failed router in an office with the same model unit using the default settings. After the installation, the technician reboots all of the PCs and servers. Upon reboot some of the PCs are receiving IP addresses on the same subnet as the new router; other PCs are receiving addresses on the same subnet as the servers. Which of the following most likely describes the issue?**A. The router is not the only DHCP serverB. DHCP was not enabled on the replacement routerC. The DHCP lease pool was not large enoughD. DHCP lease times were set too low****Answer: A****Explanation:**This happens when there are multiple DHCP servers in the same LAN subnet. Here some machines are getting ip address from the router while some are getting ip address from another DHCP server present in the same domain.

NEW QUESTION: 3On an EMC Data Domain system, what is the purpose of the log host add <host> command?**A. Enable sending log messages using SNMPB. Add a system to the list that receives system log messagesC. Enable the Data Domain system to receive log messagesD. Add a system to the list that receives alert messages****Answer: B**

NEW QUESTION: 4You are backing up two different NAS servers, each with direct-attached tape drives. Backup Client X has 10 files of 100 MB each. Backup Client Y has 1,000 files of 1 MB each. What will happen under identical backup infrastructures?**A. Client Y will generate more backup catalog entriesB. Clients X and Y will generate the same amount of backup catalog entriesC. Clients X and Y will not increase the size of the catalog entriesD. Client X will generate more backup catalog entries****Answer: A**
