What does this figure depict?**A.** Costs are higher than planned.**B.** Project is behind the schedule.**C.** Project is ahead of the schedule.**D.** Project is right on target.**Answer: D**
Explanation/Reference: Explanation: According to the question, the schedule variance (SV) of the project is zero. A value of 0 indicates that the project is right on target. Schedule variance (SV) is a measure of schedule performance on a project. The variance notifies that the schedule is ahead or behind what was planned for this period in time. The schedule variance is calculated based on the following formula: $SV = \text{Earned Value (EV)} - \text{Planned Value (PV)}$ If the resulting schedule is negative, it indicates that the project is behind schedule. A value greater than 0 shows that the project is ahead of the planned schedule. A value of 0 indicates that the project is right on target. Incorrect Answers: **B:** The positive SV depicts that the project is ahead of the planned schedule. **C:** The negative SV means that project is behind the schedule. **D:** This result can be drawn by looking at the cost variance (CV) of the project.
