What should you do?**A.** Configure device attestation that uses X.509 certificates.**B.** Disenroll and reenroll Device1.**C.** Configure the re-provisioning policy.**D.** Implement device certificate rolling.**Answer: C****Explanation:**Automated re-provisioning support.Microsoft added first-class support

for device re-provisioning which allows devices to be reassigned to a different IoT solution sometime after the initial solution assignment. Re-provisioning support is available in two options: Factory reset, in which the device twin data for the new IoT hub is populated from the enrollment list instead of the old IoT hub. This is common for factory reset scenarios as well as leased device scenarios. Migration, in which device twin data is moved from the old IoT hub to the new IoT hub.
