**NEW QUESTION: 2** 次の構成を持つオンプレミスの多層アプリケーションを管理します。\*

SQL1とSQL2という名前の2つのSQL Server 2012データベース

IISを実行するAppServer1とAppServer2という名前の2つのアプリケーションサーバー  
アプリケーションをAzureに移行する予定です。

Azureの更新サイクルまたはハードウェア障害の間、アプリケーションが利用可能であり続けることを確実にする必要があります。

どの2つの配置構成を実装する必要がありますか？それぞれの正しい答えは解決策の一部を表しています。  
**A.** AppServer1とAppServer2を単一の可用性セットに展開します。  
**B.**

すべてのサーバーを単一の可用性セットに展開します。  
**C.**

SQL2とAppServer2を単一の可用性セットに展開します。  
**D.**

SQL1とAppServer1を単一の可用性セットに展開します。  
**E.**

SQL1とSQL2を単一の可用性セットに展開します。  
**Answer: A, E**  
**Explanation:** You should deploy AppServer1 and AppServer2 in a single availability set. You should deploy SQL1 and SQL2 in a single availability set. Note: Using availability sets allows you to build in redundancy for your Azure services. By grouping related virtual machines and services (tiers) into an availability set (in this case, deploying both of your databases into an availability set), you ensure that if there is a planned or unplanned outage, your services will remain available. At the most basic level, virtual machines in an availability set are put into a different fault domain and update domain. An update domain allows virtual machines to have updates installed and then the virtual machines are rebooted together. If you have two virtual machines in an availability set, each in its own update domain, a rebooting of one server does not bring down all of the servers in a given tier. A fault domain operates in the same manner, so if there is a physical problem with a server, rack, network, or other service, both machines are separated, and services will continue.  
**Incorrect Answers:** B: You should not deploy all servers in a single availability set. This

will not provide the fault tolerance needed, as all machines would be rebooted (or suffer a hardware failure) together. C: SQL1 and AppServer1 provide different services, so they should not be grouped together. D: You should not deploy SQL2 and AppServer2 in a single availability set. SQL2 and AppServer2 provide different services, so they should not be grouped together.
