NEW QUESTION: 3DRAG DROP**Answer:** Explanation:Explanation:The Service Bus relay service enables you to build hybrid applications that run in both anAzure datacenter and your own on-premises enterprise environment. The Service Bus relay facilitates this by enabling you to securely expose Windows CommunicationFoundation (WCF) services that reside within a corporate enterprise network to the public cloud, without having to open a firewall connection, or requiring intrusive changes to a corporate network infrastructure.The Service Bus relay enables you to host WCF services within your existing enterprise environment. You can then delegate listening for incoming sessions and requests to theseWCF services to the Service Bus service running within Azure. This enables you to expose these services to application code running in Azure, or to mobile workers or extranet partner environments.References: <https://docs.microsoft.com/en-us/azure/service-bus-relay/service-bus-dotnet-how-to-use-relay>
