NEW QUESTION: 2 Universal Containers (UC) has developed extensions of Salesforce Service Cloud for the use of its customer service teams using the change set development model. Recently, UC acquired a company that develops extensions of an AppExchange app. The development team of the acquired company uses the org development model. The Universal Containers CTO wants both teams to work on a single org and follow the same set of processes. Which development model should the architect recommend to be used by the consolidated development team? **A.** Org development model, because the acquired company's team is already using it, and it is better than the change set development model. **B.** Change set development model, because UC is already using it, so it will face less resistance. **C.** Package development model, so teams can build release artifacts that can be tested and released independently from artifacts for other projects. **D.** Package development model, because it allows packages to be created and deployed using declarative (point-and-click) development tools, without writing code. **Answer: A**

NEW QUESTION: 3 Four days after admission for cirrhosis of the liver, the nurse observes the following when assessing a male client: increased irritability, asterixis, and changes in his speech pattern. Which of the following foods would be appropriate for his bedtime snack?
A. Fresh fruit
B. A ham and cheese sandwich
C. Saltine crackers and peanut butter
D. A milkshake
Answer: D
Explanation: (A) Albumin, a blood volume expander, increases the circulating blood volume by exerting an osmotic pull on tissue fluids, pulling them into the vascular system. This fluid shift causes an increase in the heart rate and blood pressure. (B) Albumin, a blood volume expander, exerts an osmotic pull on fluids in the interstitial spaces, pulling the fluid back into the circulatory system. This fluid shift causes an increase in the urinary output. (C) Adventitious breath sounds and dyspnea can occur due to circulatory overload if the albumin is infused too rapidly. (D) Chills, fever, itching, and rashes are signs of a hypersensitivity reaction to albumin.
