Estruturit assures you that you will pass your Oracle 1z0-1085-24 exam with the help of pdf 1z0-1085-24 exam dumps, The Oracle 1z0-1085-24 sure pass download will give you a bright and clear study method to do the preparation practice.

1z0-1085-24 Customizable Exam Mode | Professional Oracle 1z0-1085-24 Latest Test Pdf: Oracle Cloud Infrastructure 2024 Foundations Associate

There must be many people who want to pass the 1z0-1085-24 exam, Through certification, you have a good chance to get into a big company and double your salary you are dreaming of (1z0-1085-24 guide torrent).

Our website is equipped with a team of professional IT trainers who write the 1z0-1085-24 test questions and approve the 1z0-1085-24 pass guide, Trust me, our Oracle Cloud Infrastructure 2024 Foundations Associate actual test pdf & Oracle Cloud Infrastructure 2024 Foundations Associate actual **Customizable 1z0-1085-24 Exam Mode** test latest version will certainly assist you to pass Oracle Oracle Cloud Infrastructure 2024 Foundations Associate as soon as possible.

Our aim is help our candidates clearing test in their first attempt by using our training materials and latest 1z0-1085-24 test answers, The high pass rate for Oracle Cloud Infrastructure 2024 Foundations Associate latest study torrent.

Your information about purchasing Oracle Cloud Infrastructure 2024 Foundations Associate practice prep dumps 1z0-1085-24 Sample Questions will never be shared with 3rd parties without your permission, Oracle knowledge is also emerging at the same time.

And unfortunately, he is not able to pass the exam (chances are >1%) Passing 1z0-1085-24 Score then, not only we provide the extension until the next attempt, but also the fee of his next attempt is paid by Estruturit.

Therefore, if you have any questions about Oracle Oracle Cloud 1z0-1085-24 Certification, you can contact us anytime you want, If you choose our 1z0-1085-24 test engine, you are going to get the certification easily.

NEW QUESTION: 1 SIMULATION Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. When you are finished performing all the tasks, click the 'Next' button. Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam. Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. You need to create a virtual network named VNET1008 that contains three subnets named subnet0, subnet1, and subnet2. The solution must meet the following requirements: * Connections from any of the subnets to the Internet must be blocked * Connections from the Internet to any of the subnets must be blocked * The number of network security groups (NSGs) and NSG rules must be minimized What should you do from the Azure portal? **A.** Step 1: Click Create a resource in the portal. Step 2: Enter Virtual network in the Search the Marketplace box at the top of the New pane that appears. Click Virtual network when it appears in the search results. Step 3: Select Classic in the Select a deployment model box in the Virtual Network pane that appears, then click Create. Step 4: Enter the following values on the Create virtual network (classic) pane and then click Create: Name: VNET1006 Address space: 10.0.0.0/18 Subnet name: subnet0 Resource group: Create new Subnet address range: 10.0.0.0/24 Subscription and location: Select your subscription and location. Step 5: In the portal, you can create only one subnet when you create

a virtual network. Click Subnets (in the SETTINGS section) on the Create virtual network (classic) pane that appears. Click +Add on the VNET1008 - Subnets pane that appears. Step 6: Enter subnet1 for Name on the Add subnet pane. Enter 10.0.1.0/26 for Address range. Click OK. Step 7: Create the third subnet: Click +Add on the VNET1008 - Subnets pane that appears. Enter subnet2 for Name on the Add subnet pane. Enter 10.0.2.0/26 for Address range. Click OK. **B.** Step 1: Click Create a resource in the portal. Step 2: Enter Virtual network in the Search the Marketplace box at the top of the New pane that appears. Click Virtual network when it appears in the search results. Step 3: Select Classic in the Select a deployment model box in the Virtual Network pane that appears, then click Create. Step 4: Enter the following values on the Create virtual network (classic) pane and then click Create: Name: VNET1008 Address space: 10.0.0.0/16 Subnet name: subnet0 Resource group: Create new Subnet address range: 10.0.0.0/24 Subscription and location: Select your subscription and location. Step 5: In the portal, you can create only one subnet when you create a virtual network. Click Subnets (in the SETTINGS section) on the Create virtual network (classic) pane that appears. Click +Add on the VNET1008 - Subnets pane that appears. Step 6: Enter subnet1 for Name on the Add subnet pane. Enter 10.0.1.0/24 for Address range. Click OK. Step 7: Create the third subnet: Click +Add on the VNET1008 - Subnets pane that appears. Enter subnet2 for Name on the Add subnet pane. Enter 10.0.2.0/24 for Address range. Click OK. **Answer: B** Explanation: References: <https://docs.microsoft.com/en-us/azure/virtual-network/create-virtual-network-classic>

NEW QUESTION: 2 You develop a Windows Communication Foundation (WCF) service that is hosted by using Windows Activation Services (WAS). You need to configure the service to accept requests that use the TCP/IP protocol. What should you do? (Each correct answer presents part of the solution. Choose two.) **A.** Run the aspnet_regiis executable to enable TCP/IP service activation. **B.** In Control Panel, enable the WCF Non-HTTP Activation feature. **C.** In Control Panel, enable the Windows Communication Foundation HTTP Activation feature. **D.** Run the appcmd executable to enable TCP/IP service activation. **Answer: C, D** Explanation: **B:** Go to the Control Panel -> Program and Features and select Turn Windows features on or off. Then you need to select some options/components to install. Have a look at the picture below to see what those options are **D:** Example: Now we need to enable those protocols on the CalculatorServiceSite website that hosts our WCF service. In the same Visual Studio 2010 command prompt window type `appcmd.exe set app "Default Web Site/CalculatorServiceSite" /enabledProtocols:http,net.pipe,net.tcp,net.msmq` Now we have enabled those protocols for our site. Now we are ready to expose endpoints over alternate protocols e.g TCP, MSMQ. In this way we can have our WCF Service hosted in IIS and still consume it over the network with clients that support/understand the TCP/IP protocol. Note: Windows Process Activation Service generalizes the Internet Information Services (IIS) process model, removing the dependency on HTTP. All the features of IIS that were previously available only to HTTP applications are now available to applications hosting Windows Communication Foundation (WCF) services, by using non-HTTP protocols. IIS 7.0 also uses Windows Process Activation Service for message-based activation over HTTP.

NEW QUESTION: 3 Refer to the exhibit. What type of attack is being mitigated on the Cisco ASA appliance? **A.** HTTPS certificate man-in-the-middle attack **B.** HTTP distributed denial of service attack **C.** HTTP Shockwave Flash exploit **D.** HTTP SQL injection attack **Answer: D**
