NEW QUESTION: 1 Which of the following is the first MOST step in the risk assessment process?
A. Identification of vulnerabilities **B.** Identification of assets **C.** Identification of threat sources **D.** Identification of threats
Answer: B
Explanation: Asset identification is the most crucial and first step in the risk assessment process. Risk identification, assessment and evaluation (analysis) should always be clearly aligned to assets. Assets can be people, processes, infrastructure, information or applications.

NEW QUESTION: 2 You have just configured Cisco CallManager. A few users in your organization complain that when they log out, the phones are reset. You need to provide a solution to this problem. What should you do?
A. Restart the TFTP service. **B.** Change the DNS address to IP address. **C.** Edit the form.jsp file and make appropriate changes. **D.** Restart the Computer Telephony Integration (CTI). **E.** Restart the Internet Information Service (IIS). **F.** Reboot the phones.
Answer: B

NEW QUESTION: 3 You are designing an AI solution that will analyze media data. The data will be stored in Azure Blob storage. You need to ensure that the storage account is encrypted by using a key generated by the hardware security module (HSM) of your company. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
Answer: Explanation:
Explanation
