NEW QUESTION: 1 Which three statements are true about SQL plan directives? **A.** They are tied to a specific statement or SQL ID. **B.** Improve plan accuracy by persisting both compilation and execution statistics in the SYSAUX tablespace. **C.** They are created for a query expression where statistics are missing or the cardinality estimates by the optimizer are incorrect. **D.** They instruct the maintenance job to collect missing statistics or perform dynamic sampling to generate a more optimal plan. **E.** They are used to gather only missing statistics. **F.** They instruct the optimizer to create only column group statistics. **Answer: C,D,F** Explanation: During SQL execution, if a cardinality misestimate occurs, then the database creates SQL plan directives. During SQL compilation, the optimizer examines the query corresponding to the directive to determine whether missing extensions or histograms exist (D). The optimizer records any missing extensions. Subsequent DBMS_STATS calls collect statistics for the extensions. The optimizer uses dynamic sampling whenever it does not have sufficient statistics corresponding to the directive. (B, not C) **E:** Currently, the optimizer monitors only column groups. The optimizer does not create an extension on expressions. **Incorrect:** Not A: SQL plan directives are not tied to a specific SQL statement or SQL ID. **Note:** * A SQL plan directive is additional information and instructions that the optimizer can use to generate a more optimal plan. For example, a SQL plan directive can instruct the optimizer to record a missing extension.

NEW QUESTION: 2 A security administrator receives an alert from a third-party vendor that indicates a certificate that was installed in the browser has been hijacked at the root of a small public C The security administrator knows there are at least four different browsers in use on more than a thousand computers in the domain worldwide. Which of the following solutions would be BEST for the security administrator to implement to most efficiently assist with this issue? **A.** CRL **B.** SSL **C.** ACL **D.** PKI **Answer: A**

NEW QUESTION: 3

VNet1という名前の仮想ネットワークを含むAzureサブスクリプションがあります。
VNet1は、10.0.0.0 / 16のIPアドレススペースを使用し、次の表のサブネットを含みます。
Subnet1には、ルーターとして動作するVM1という名前の仮想アプライアンスが含まれています。

RT1という名前のルーティングテーブルを作成します。

すべての受信トラフィックをVM1を介してVNet1にルーティングする必要があります。
