注：それぞれの正しい選択には1ポイントの価値があります。**Answer:** Explanation:

NEW QUESTION: 4 You are working on a home computer with Windows XP installed on it. Microsoft Office 2010 is also installed on the computer. By default, Access stores all the databases and projects created by you in the C:\Documents and Settings\user\My Documents folder. You want to change this location to the E:\New projects folder so that all your future databases and projects will be saved in the New projects folder by default. Which of the following steps will you take to accomplish the task?
A. File > Save As > Specify a name
B. File > Options > Default database location
C. File > Save & Publish > Save As
D. File > File Name > Create
Answer: B **Explanation:** Take the following steps to change the default database location:
1. Click the File tab to open the File gallery.
2. Click the Options button to open the Access Options dialog box.
3. Type or browse to the path to the new default database location on the Default Database Folder text box of default General page.
Answer A and C are incorrect. By

following these steps, you can simply save your database and project on the desired location, but these steps will not help in setting the location as a default database location. You have to manually choose the location every time you are going to save a new database or project. Answer D is incorrect. By following these steps, you can create a new database in Microsoft Access 2010.
