### NEW QUESTION: 2 What can be done to secure the virtual terminal interfaces on a router?

(Choose two.) A. Physically secure the interface. B. Enter an access list and apply it to the virtual terminal interfaces using the access-class command. C. Administratively shut down the interface. D. Create an access list and apply it to the virtual terminal interfaces with the access-group command. E. Configure a virtual terminal password and login process. Answer:

B,E Explanation: Explanation It is a waste to administratively shut down the interface. Moreover, someone can still access the virtual terminal interfaces via other interfaces -> We can not physically secure a virtual interface because it is "virtual" -> To apply an access list to a virtual terminal interface we must use the "access-class" command. The "access-group" command is only used to apply an access list to a physical interface -> C is not correct. The most simple way to secure the virtual terminal interface is to configure a username & password to prevent unauthorized login.

**NEW QUESTION: 4** New Gestalt, Inc., a software firm had a net income of 1.7 million last year. It has 200,000 common shares and 300,000 convertible bonds with face value of 100 outstanding. The convertible bonds carry a coupon of 4% and can be converted one-for-one. The average stock price last year was 39 and the maximum price was 57. The effective interest rate on the convertible debt is 8%. New Gestalt issued 100,000 preferred shares with face value 100 and a coupon of 5% on March 31st of last year. Assume the convertible bonds are dilutive and that New Gestalt faces a 30% tax rate. Given the above, New Gestalt's Diluted EPS equals\_\_\_\_\_.  
**A. 7.45B. 6.01C. 2.65D. 7.51****Answer: B**Explanation:Explanation/Reference:Explanation:Diluted EPS = (Net Income - Preferred dividends + interest on convertibles net of taxes)/(weighted # of common shares assuming convertible conversion) In this case, numerator = 1.7 million - 375,000 + 300,000\*8%\*100\*(1-30%) = 3,005,000. The denominator equals 200,000 + 300,000 = 500,000. Therefore, Diluted EPS = 6.01. Note that the interest expense on the convertible bond is calculated using the effective interest rate, not the coupon rate.
