NEW QUESTION: 1What happens, by default, when one of the resources in a CloudFormation stack cannot be created?**A.** Previously-created resources are deleted and the stack creation terminates.**B.** CloudFormation templates are parsed in advance so stack creation is guaranteed to succeed.**C.** Previously-created resources are kept but the stack creation terminates.**D.** The stack creation continues, and the final results indicate which steps failed.**Answer: A**

Explanation:<https://docs.aws.amazon.com/AWSCloudFormation/latest/UserGuide/stacks.html>
AWS CloudFormation ensures all stack resources are created or deleted as appropriate. Because AWS CloudFormation treats the stack resources as a single unit, they must all be created or deleted successfully for the stack to be created or deleted. If a resource cannot be created, AWS CloudFormation rolls the stack back and automatically deletes any resources that were created. If a resource cannot be deleted, any remaining resources are retained until the stack can be successfully deleted.

NEW QUESTION: 2**A.** Option **B****B.** Option **D****C.** Option **A****D.** Option **C****Answer: A,B**

NEW QUESTION: 3Which of the following reports are delivered under oath to a board of directors/managers/panel of the jury?**A.** Written Formal Report**B.** Verbal Formal Report**C.** Written Informal Report**D.** Verbal Informal Report**Answer: B**
