With ten years' dedication to collect, summarize and check the question and answers, 300-425 free download pdf has a good command of the knowledge points tested in the exam, thus making the questions more targeted and well-planned.

You can view Estruturit's content by downloading free Cisco 300-425 dumps demo before buying CCNP Enterprise PDF actually, We have everything you need to improve your Designing Cisco Enterprise Wireless Networks exam score.

In order to remove your doubts, we have released the free demo of the 300-425 valid vce for you.

NEW QUESTION: 1HOTSPOTYou need implement tools at the client's location for monitoring and deploying Azure resources.Which tools should you use? To answer, select the appropriate on-premises tool for each task in the answer area.**Answer:** Explanation:* System Center Virtual Machine Manager (SCVMM) enables rapid provisioning of new virtual machines by the administrator and end users using a self-service provisioning tool.* System Center Operations Manager (SCOM) is a cross-platform data center management system for operating systems and hypervisors. It uses a single interface that shows state, health and performance information of computer systems. It also provides alerts generated according to some availability, performance, configuration or security situation being identified.The basic idea is to place a piece of software, an agent, on the computer to be monitored. The agent watches several sources on that computer, including the Windows Event Log, for specific events or alerts generated by the applications executing on the monitored computer.* Scenario:Leverage familiarity with Microsoft server management tools.Manage hosted resources by using on-premises tools.Mitigate the need to purchase additional tools for monitoring and debugging.Use advanced monitoring features and reports of workloads in Azure by using existing Microsoft tools.References:

http://en.wikipedia.org/wiki/System_Center_Operations_ManagerTopic 14, Trey Research Inc, Case C Background You are software architect for Trey Research Inc, a Software as a service (SaaS) company that provides text analysis services. Trey Research Inc, has a service that scans text documents and analyzes the content to determine content similarities. These similarities are referred to as categories, and indicate groupings on authorship, opinions, and group affiliation.The document scanning solution has an Azure Web App that provides the user interface. The web app includes the following pages:* Document Uploads: This page allows customers to upload documents manually.* Document Inventory: This page shows a list of all

processed documents provided by a customer. The page can be configured to show documents for a selected category.* Documents Upload Sources: This page shows a map and information about the geographic distribution of uploaded documents. This page allows users to filter the map based on assigned categories. The web application is instrumented with Azure Application Insight. The solution uses Cosmos DB for data storage. Changes to the web application and data storage are not permitted. The solution contains an endpoint where customers can directly upload documents from external systems. Document ProcessingSource DocumentsDocuments must be in a specific format before they are uploaded to the system. The first four lines of the document must contain the following information. If any of the first four lines are missing or invalid, the document must not be processed.* the customer account number* the user who uploaded the document* the IP address of the person who created the document* the date and time the document was createdThe remaining portion of the documents contain the content that must be analyzed. prior to processing by the Azure Data Factory pipeline, the document text must be normalized so that words have spaces between them.Document UploadsDuring the document upload process, the solution must capture information about the geographic location where documents originate. Processing of documents must be automatically triggered when documents are uploaded. Customers must be notified when analysis of their uploaded documents begins.Uploaded documents must be processed using Azure Machine Learning Studio in an Azure Data Factory pipeline. The machine learning portion of the pipeline is uploaded once a quarter.When document processing is complete, the documents and the results of the analysis process must be visible.Other requirementsBusiness AnalysisTrey Research Inc. business analysis must be able to review processed documents, and analyze data by using Microsoft Excel.Business analysis must be able to discover data across the enterprise regardless of where the data resides.Data ScienceData scientists must be able to analyze results without charging the deployed application. The data scientists must be able to analyze results without being connected to the Internet.Security and Personally Identifiable Information (PII)* Access to the analysis results must be limited to the specific customer account of the user that originally uploaded the documents.* All access and usage of analysis results must be logged. Any unusual activity must be detected.* Documents must not be retained for more than 100 hours.Operations* All application logs, diagnostic data, and system monitoring must be available in a single location.* Logging and diagnostic information must be reliably processed.* The document upload time must be tracked and monitored.

NEW QUESTION: 2 Was sollte das Hauptziel während der Entwicklungstests sein?**A.** Zur Bestätigung, dass das System wie erwartet funktioniert und die Anforderungen erfüllt wurden **B.** Zur Beurteilung der Qualität der Software, ohne die Absicht, Fehler zu beheben **C.** Informationen für Interessengruppen über das Risiko der Freigabe des Systems zu einem bestimmten Zeitpunkt **D.** Um so viele Fehler wie möglich zu verursachen, damit Fehler in der Software erkannt und behoben werden können **Answer: D**

NEW QUESTION: 3 **A.** Option **D.** Option **H.** Option **G.** Option **E.** Option **B.** Option **A.** Option **F.** Option **C.** **Answer: E** Explanation: Explanation sys.dm_exec_sessions returns one row per authenticated session on SQL Server. sys.dm_exec_sessions is a server-scope view that shows information about all active user connections and internal tasks. This information includes client version, client program name, client login time, login user, current session setting, and more. Use sys.dm_exec_sessions to first view the current system load and to identify a session of interest, and then learn more information about that session by using other dynamic management views or dynamic management functions. Examples of use include finding long-running cursors, and finding idle sessions that have open transactions.
