Only exam success is not enough to win a position in today's competitive [C-THR82-2311](#) world, you need also to secure an excellent score, App online version-Be suitable to all kinds of equipment or digital devices.

ABC.com provides the most comprehensive SAP C-THR82-2311 braindumps questions that is available in the market;

**NEW QUESTION: 1**You are testing an application. The application includes methods named CalculateInterest and LogLine. The CalculateInterest() method calculates loan interest. The LogLine() method sends diagnostic messages to a console window. The following code implements the methods. (Line numbers are included for reference only.) You have the following requirements: The CalculateInterest() method must run for all build configurations. The LogLine() method must run only for debug builds. You need to ensure that the methods run correctly. What are two possible ways to achieve this goal? (Each correct answer presents a complete solution. Choose two.)  
**A.** Insert the following code segment at line 05: #if DEBUG  
Insert the following code segment at line 07: #endif  
**B.** Insert the following code segment at line 10: [Conditional("DEBUG")]  
**C.** Insert the following code segment at line 10: [Conditional("RELEASE")]  
**D.** Insert the following code segment at line 01: #if DEBUG  
Insert the following code segment at line 10: #endif  
**E.** Insert the following code segment at line 01: [Conditional("DEBUG")]  
**F.** Insert the following code segment at line 01: #region DEBUG  
Insert the following code segment at line 10: #endregion  
**G.** Insert the following code segment at line 05: #region DEBUG  
Insert the following code segment at line 07: #endregion  
**Answer: A,B**  
Explanation: Explanation/Reference: Explanation: D: Also, it's worth pointing out that you can use [Conditional("DEBUG")] attribute on methods that return void to have them only executed if a certain symbol is defined. The compiler would remove all calls to those methods if the symbol is not defined: [Conditional("DEBUG")] void PrintLog() { Console.WriteLine("Debug info"); } void Test() { PrintLog(); } G: When the C# compiler encounters an #if directive, followed eventually by an #endif directive, it will compile the code between the directives only if the specified symbol is defined. Unlike C and C++, you cannot assign a numeric value to a symbol; the #if statement in C# is Boolean and only tests whether the symbol has been defined or not.

For example, # define DEBUG # if DEBUG Console.WriteLine("Debug version"); # endif

## NEW QUESTION: 2

どの会社でも重要な決定は、依存するデータシステムをホストする場所に関するものです。データセンターのスペースをリースするのか、独自のデータセンターを構築するのが最適か、そして現在クラウドコンピューティングでクラウド内のリソースを購入するのかどうかについては、議論があります。

クラウドサービスを調達するのではなく、データセンターのスペースをリースする最大の利点は何ですか。**A. 規制 B. コスト C. コントロール D. セキュリティ**  
**Answer: C**  
**Explanation:** When leasing space in a data center versus utilizing cloud services, a customer has a much greater control over its systems and services, from both the hardware/software perspective and the operational management perspective. Costs, regulations, and security are all prime considerations regardless of the hosting type selected. Although regulations will be the same in either hosting solution, in most instances, costs and security will be greater factors with leased space.

**NEW QUESTION: 3** DRAG DROP You plan to deploy a Microsoft Azure RemoteApp collection by using a custom template image. The image will contain Microsoft Word and Excel Office 365 ProPlus programs. You need to install the Word and Excel programs. The solution must minimize the amount of Internet traffic used during installation. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Select and Place:  
**Answer:** Explanation: Explanation/Reference: Explanation: The first step is to download the Office Deployment Tool. You then need to modify the configuration file. This will be used to specify the installation options for Word and Excel. You then run Setup.exe from the Office Deployment Tool with the /download option to download the required software based on the options in the configuration file. The final step is to install Word and Excel by running Setup.exe from the Office Deployment Tool with the /configure option to install the required software based on the options in the configuration file.
