NEW QUESTION: 1 There are several ways to price Maximo solutions. Which group is valid pricing for Maximo solutions?**A. 25:1B. 10:1C. 2:1D. 1:1****Answer: A****Explanation:**Reference: ftp://ftp.software.ibm.com/software/tivoli_support/misc/STE/2013_04_11_AVKS_Maximo_License_g_Overview.pdf

NEW QUESTION: 2 Which of the following would BEST enhance firewall security?**A. Implementing change-control practicesB. Placing the firewall on a screened subnetC. Providing dynamic address assignmentD. Logging of security events****Answer: B**

NEW QUESTION: 3 Refer to the exhibit. Which action must you take to enable the WAN link to function properly?**A. Enter a clock rate on the DCE interface.B. Configure both interfaces for HDLC encapsulation.C. Enter a compression algorithm on both interfaces.D. Enter a clock rate on the DTE interface.****Answer: A****Explanation:**When connecting a serial cable to the serial interface of the router, clocking is provided by an external device, such as a CSU/DSU device. A CSU/DSU (Channel Service Unit/Data Service Unit) is a digital-interface device used to connect a router to a digital circuit. The router is the DTE (Data Terminal Equipment) and the external device is the DCE (Data Communications Equipment), where the DCE provides the clocking. However, in some cases we might connect two routers back-to-back using the routers' serial interfaces (Example. Inside the router labs). Each router is a DTE by default. Since clocking is required to enable the interface, one of the two routers should function as DCE and should provide clocking. This can be done by using the "clock rate" command, from the interface configuration mode.**Reference:** [http://www.omniseccu.com/cisco-certified-network-associate-ccna/how-to-configurerouter-serial-interfaces.php](http://www.omniseccu.com/cisco-certified-network-associate-ccna/how-to-configurerouter-seria-interfaces.php)
