Die Lösung muss die Anzahl der Fehlalarme minimieren. Welche beiden Einstellungen sollten Sie ändern? Um zu antworten, wählen Sie die entsprechenden Einstellungen im Antwortbereich. **HINWEIS:** Jede richtige Auswahl ist einen Punkt wert. **Answer:** Explanation: You can tune your rules by adjusting the instance count and match accuracy to make it harder or easier for content to match the rules. Each sensitive information type used in a rule has both an instance count and match accuracy. To make the rule easier to match, decrease the min count and/or increase the max count. You can also set max to any by deleting the numerical value. To minimize the number of false positives, we need to increase the minimum match accuracy. A sensitive information type is defined and detected by using a combination of different types of evidence. Commonly, a sensitive information type is defined by multiple such combinations, called patterns. A pattern that requires less evidence has a lower match accuracy (or confidence level), while a pattern that requires more evidence has a higher match accuracy (or confidence level).
