NEW QUESTION: 1 Automatic registration of devices with the SteelCentral Controller for SteelHead (SCC) requires which one of the following?
A. The SCC must have joined the Windows domain
B. Pre-trusted SSL certificates on the devices and SCC
C. The serial number of the managed device to be preconfigured in the SCC
D. The name "riverbedcmc" to be an entry in DNS resolving to the SCC primary IP address
E. RiOS 8.0 for SteelHead and 4.0 for Interceptor
Answer: D
Explanation: Explanation/Reference: See last paragraph below. To use automatic registration, prepare the appliance for registration with the SCC by entering the IP address or DNS-registered hostname of the SCC when you run the configuration wizard on the appliance. Riverbed recommends that you set up your DNS servers to resolve riverbedcmc to the primary interface IP address of your SCC. If you configure your DHCP servers to forward the correct DNS settings, any appliance added into the network and powered on should automatically register with the SCC. Alternatively, you can use the cmc enable and cmc hostname commands. If you do not change the default hostname, it remains riverbedcmc. NEW QUESTION: 2 In Year 2, a manufacturing company instituted a total quality management (TQM) program producing the following report: On the basis of this report, which one of the following statements is most likely true?
A. Quality costs, such as scrap and rework, decreased by 48%.
B. An increase in inspection costs was solely responsible for the decrease in quality costs.
C. An increase in prevention and appraisal costs resulted in a higher quality product and therefore resulted in a decrease in failure costs.
D. Quality costs, such as returns and repairs under warranty, decreased by 40%.
Answer: C
Explanation: Prevention and appraisal costs increased substantially, but internal and external failure costs decreased. Thus, the soundest conclusion is that the increase in prevention and appraisal costs resulted in a higher-quality product.
