**NEW QUESTION: 1** Which two potential customers represent the best opportunities for location-based services? (Select two.)  
**A.** a flea market that wants to provide fee-based guest Wi-Fi services  
**B.** an airport that wants to increase traffic to their tenants' businesses  
**C.** a cell phone store chain that wants to display their stores' hours on their phones  
**D.** a hospital that needs to keep patient records secure  
**E.** a hotel chain that wants to improve guest satisfaction ratings  
**Answer: A,D**

**NEW QUESTION: 2** Which option is the Cisco recommended method to secure access to the console port?  
**A.** Configure a very short timeout (less than 100 milliseconds) for the port.  
**B.** Configure an ACL.  
**C.** Configure the activation-character command.  
**D.** Set the privilege level to a value less than 15.  
**Answer: C**  
**Explanation:** The activation-character command defines a session activation character. Entering this character at a vacant terminal begins a terminal session. The default activation character is the Return key. To secure the console port, you should change this character to a different one as most people simply hit the enter key when trying to access the console.

**NEW QUESTION: 3** There are more adult children dealing with issues concerning aging parents than ever before. Many clinical social work professionals specialize in services for senior citizens. They also initiate support groups for their families and caretakers. There are three main focuses to this practice, two of which include assessment and coordination. What is the third?  
**A.** Providing education services  
**B.** Dissolving conflicts  
**C.** Locating family members  
**D.** Monitoring services  
**Answer: D**  
**Explanation:** Many aging adults require help with everyday needs such as housing, transportation, meals, and long-term care. Clinical social workers provide agency referrals necessary for in-home care and proper medical supplies. They assess the needs of the situation, coordinate solutions, and monitor their implementation.

**NEW QUESTION: 4** Which statements are true about EIGRP successor routes? (Choose two.)  
**A.** Successor routes are saved in the topology table to be used if the primary route fails.  
**B.** Successor routes are flagged as 'active' in the routing table.  
**C.** A successor route is used by EIGRP to forward traffic to a destination.  
**D.** A successor route may be backed up by a feasible successor route.  
**E.** Successor routes are stored in the neighbor table following the discovery process.  
**Answer: C,D**  
**Explanation/Reference:** Introduction to EIGRP  
**Reference:** [http://www.cisco.com/en/US/tech/tk365/technologies\\_tech\\_note09186a0080093f07.shtml](http://www.cisco.com/en/US/tech/tk365/technologies_tech_note09186a0080093f07.shtml)  
**Explanation:** Feasible Successors A destination entry is moved from the topology table to the routing table when there is a feasible successor. All minimum cost paths to the destination form a set. From this set, the neighbors that have an advertised metric less than the current routing table metric are considered feasible successors. Feasible successors are viewed by a router as neighbors that are downstream with respect to the destination. These neighbors and the associated metrics are placed in the forwarding table. When a neighbor changes the metric it has been advertising or a topology change occurs in the network, the set of feasible successors may have to be re-evaluated. However, this is not categorized as a route recomputation.
