You can feel exam pace and hold time to test with our C-TS4CO-2023 practice questions, And the long-term researches about actual questions of past years are the essential part to practice and remember.

First, it is rich experienced and professional.

**NEW QUESTION: 1** which of the following best describes why table locking is often not desirable compared to page or row locking?**A.** Table locks prevent other clients from making any changes to the table until released.**B.** Table locks create concurrency issues.**C.** Table locks can cause data corruption issues if more than one client tries to make changes while locked.**D.** Table locks can have deadlocks.**Answer: B**  
**Explanation:** Explanation: 28.1. Locking Concepts Table locking is not as desirable as page or row locking for concurrency in a mixed read/write environment. A table lock prevents other clients from making any changes to the table, even if the client that holds the lock is not accessing the parts of the table that other clients want to modify. With page and row locks, a client that locks a page or row does not prevent changes by other clients to other pages or rows. Deadlock cannot occur with table locking as it can with page or row locking.

**NEW QUESTION: 2** After running the command `umount /mnt`, the following error message is displayed: `umount: /mnt: device is busy`. What is a common reason for this message?**A.** Another file system still contains a symlink to a file inside /mnt.**B.** The kernel has not finished flushing disk writes to the mounted device.**C.** The kernel thinks that a process is about to open a file in /mnt for reading.**D.** A user has a file open in the /mnt directory.**E.** The files in /mnt have been scanned and added to the locate database.**Answer: D**

**NEW QUESTION: 3** Which technology can ensure data confidentiality, data integrity, and authentication across a public IP network?**A.** VLANs**B.** GRE**C.** VPD**D.** IPSec**Answer: D**  
**Explanation:** IPSec is a framework of open standards developed by the Internet Engineering Task Force (IETF) that provides security for transmission of sensitive information over unprotected networks such as the Internet. IPSec provides a robust security solution and is standards-based. IPSec also provides data authentication and anti-replay services in addition to data confidentiality services
