Valid NPPE Practice Questions, Perhaps you have trained several times to passing the test, but the results are always not so clear about your mind so you just have to try and try.

Accuracy NPPE exam training guide, If you choose NPPE exam materials of us, we will ensure your safety.

NEW QUESTION: 1You are the project manager of the NHA Project. This project is expected to last one year with quarterly milestones throughout the year. Your project is supposed to be at the third milestone today but you're likely only 60 percent complete. Your project has a BAC of \$745,000 and you've spent \$440,000 of the budget- to-date. What is your schedule performance index for this project?**A. 0B. 0.80C. 1D. 1.02****Answer: B****Explanation:**Explanation/Reference: Explanation:The schedule performance index can be found by dividing the earned value by the planned value. In this project, it's \$447,000 divided by the \$558,750 for a value of 0.80. Schedule performance index (SPI) is the measure of schedule efficiency on a project. It is used in trend analysis to predict future performance.SPI is the ratio of earned value to planned value. The SPI is calculated based on the following formula:
$$SPI = \frac{\text{Earned Value (EV)}}{\text{Planned Value (PV)}}$$
If the SPI value is greater than 1, it indicates better than expected performance, whereas if the value is less than 1, it shows poor performance. The SPI value of 1 indicates that the project is right on target.**Incorrect Answers:**A: "80" is not the same value as ".80".B: 1.02 is the cost performance index.C: 102 is not a valid calculation for this question.

NEW QUESTION: 2Which of the following is NOT recognized as being a common characteristic of cloud-computing services?**A. The service's infrastructure is shared among the supplier's customers and can be located in a number of countries.B. The supplier assumes the vendor's business risk associated with data processed by the supplier.C. The supplier determines the location, security measures, and service standards applicable to the processing.D. The supplier allows customer data to be transferred around the infrastructure according to capacity.**

Answer: B
