**NEW QUESTION: 3** How should you configure the release retention policy for the investment planning depletions suite? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Explanation Every request made against a storage service must be authorized, unless the request is for a blob or container resource that has been made available for public or signed access. One option for authorizing a request is by using Shared Key. Scenario: The mobile applications must be able to call the share pricing service of the existing retirement fund management system. Until the system is upgraded, the service will only support basic authentication over HTTPS. The investment planning applications suite will include one multi-tier web application and two iOS mobile application. One mobile application will be used by employees; the other will be used by customers. References:
