NEW QUESTION: 1In a competitive market, an increase in the minimum wage will likely have the following effects:**A.** Firms paying at the current minimum wage rate would generally be unaffected if the marginal revenue produced by the lowest paid workers does not exceed the new higher cost of the worker. Many firms would thus be forced to work more efficiently.**B.** Firms currently paying above the new minimum wage would generally raise their pay rates (although the new minimum wage creates a new floor for employee wage bargaining purposes).**C.** Total employment will likely decrease in affected industries and generate unemployment. Employers will demand a smaller number of workers while a larger number of workers will be attracted by the higher wage.**D.** If a marginally more expensive form of capital is available to substitute for labor (e.g., due to technological advances), firms will reduce their use of labor.
Answer: C Explanation: Choice "c" is correct. With an increase in the minimum wage, total employment will likely decrease in affected industries and generate unemployment. Employers will demand a smaller number of workers while a larger number of workers will be attracted by the higher wage. Choice "a" is incorrect. Firms currently paying above the new minimum wage would generally be unaffected, not raise their pay rates. Choice "b" is incorrect. Firms paying at the current minimum wage rate would attempt to reduce labor, not generally be unaffected. Choice "d" is incorrect. If a marginally cheaper, not more expensive. Volume C

A. `cat /etc/default/passwd | grep jack
B. cat /etc/shadow | grep jack
C. cat /etc/passwd | grep jack
D. cat /etc/group | grep jack
Answer: C
Explanation: Explanation/Reference: Explanation: The /etc/passwd contains one entry per line for each user (or user account) of the system. All fields are separated by a colon (:) symbol. Total seven fields as follows.
1. Username: It is used when user logs in. It should be between 1 and 32 characters in length.
2. Password: An x character indicates that encrypted password is stored in /etc/shadow file.
3. User ID (UID): Each user must be assigned a user ID (UID). UID 0 (zero) is reserved for root and UIDs 1-99 are reserved for other predefined accounts. Further UID 100-999 are reserved by system for administrative and system accounts/groups.
4. Group ID (GID): The primary group ID (stored in /etc/group file)
5. User ID Info: The comment field. It allow you to add extra information about the users such as user's full name, phone number etc. This field use by finger command.
6. Home directory: The absolute path to the directory the user will be in when they log in. If this directory does not exists then users directory becomes /.
Command/shell: The absolute path of a command or shell (/bin/bash). Typically, this is a shell. Please note that it does not have to be a shell.`
