NEW QUESTION: 1 Which of the following requires a MINIMUM of four hard drives? **A. RAID 0 B. RAID 5 C. RAID 10 D. RAID 1** **Answer: C**

NEW QUESTION: 2 This question addresses the EnCase for Windows search process. If a target word is within a logical file, and it begins in cluster 10 and ends in cluster 15 (the word is fragmented), the search: **A. Will not find it because EnCase performs a physical search only. B. Will find it because EnCase performs a logical search. C. Will not find it because the letters of the keyword are not contiguous. D. Will not find it unless slack is checked on the search dialog box.** **Answer: B**

NEW QUESTION: 3 During a Manufacturing Cloud implementation, the Production Supervisor wants to close the work orders for last month and wants to make sure that the work orders include the correct cost. Identify the approach to be taken by the Production Supervisor. **A. The Production Supervisor needs to include all costs and variances in last month's work orders and close them; however, the work orders where updates are expected, should not be closed. B. The Production Supervisor should make sure that all costs are included while closing last month's work orders; however, variances can be included after closing the work orders. C. Work order costs can be updated anytime regardless of the status of the work order. D. The Production Supervisor need not include cost variances while costing last month's work orders because those can be applied directly in subledger accounting.** **Answer: A**

NEW QUESTION: 4 You have created a public subnet and an internet gateway in your virtual cloud network (VCN). The public subnet has an associated route table and security list. However, after creating several compute instances in the public subnet, none can reach the Internet. Which two are possible reasons for the connectivity issue? (Choose two.) **A. There is no stateful ingress rule in the security list associated with the public subnet B. The route table has no default route for routing traffic to the internet gateway C. There is no dynamic routing gateway (DRG) associated with the VCN D. There is no stateful egress rule in the security list associated with the public subnet** **Answer: A, D** **Explanation:** <https://docs.cloud.oracle.com/iaas/Content/Network/Concepts/securitylists.htm>
