Free PDF 2024 APICS CTSC Useful Exam Quiz

I view the book as having multiple benefits, Secondly, the price of the CTSC study materials is favourable, This mode will definitely give you an edge in real exam.

Convenient for reading, Estruturit provide all candidates with CTSC test torrent that is compiled by experts who have good knowledge of CTSC exam, and they are very professional in compile CTSC study materials.

CTSC practice tests are written to the highest standards of technical accuracy which can make you succeed in the exam, Secondly, we have good reputation in this field that many people know our passing rate of CTSC actual test latest version is higher than others; our accuracy of actual test dumps is better than others.

Choosing the best product for you really saves a lot **Exam CTSC Quiz** of time, We would like to benefit our customers from different countries who decide to choose our CTSC study guide in the long run, so we cooperation with the leading experts in the field to renew and update our CTSC study materials.

It's our instinct to pursue good material and better life, If you buy CTSC exam study material, we promise you a safe shopping environment, you can buy the CTSC pdf study material without any hesitation, since we have a trustworthy [Practice Test C_LIXEA_2404 Pdf](#) system for our customers so that you won't be frustrated about some spam messages or even your privacy being revealed.

Pass Guaranteed Quiz Reliable CTSC - Certified in Transformation for Supply Chain (CTSC) Exam Quiz

Please believe that we will not let you down, Just **Exam CTSC Quiz** like the old saying goes: "Facts are stronger than arguments." You can choose to download our free demo at any time as you like, you are always welcome to have a try, and we trust that our CTSC exam materials will never let you down.

You see, we have professionals handling the latest IT information so as to adjust the outline for the exam dumps at the first time, thus to ensure the APICS CTSC training dumps shown front of you is the latest and most relevant.

You can download the free CTSC pdf demo in our website and one-year free update your CTSC exam pdf will be allowed after you make payment, Estruturit also offers CTSC practice test to practice for CTSC exam in real exam scenario.

We guarantee to full refund you if failed the exam with CTSC dumps valid, Thoughtful aftersales services, If our CTSC test dumps do not help you pass exam paper, we shall refund your money in full.

Different formats have different features & advantages, but you can choose any version or the package version of CTSC certification dumps as three versions have same questions and answers.

Besides, you have access to free update the Certified in Transformation for Supply Chain (CTSC) actual **Exam CTSC Quiz** exam dumps one-year after you become a member of Estruturit, Just visualize the feeling of achieving success by using our CTSC Latest Real Test Questions exam guide, so you can easily understand the importance of choosing a high quality and accuracy CTSC Latest Real Test Questions training engine.

NEW QUESTION: 1 Background Corporate Information Fabrikam, Inc. is a retailer that sells electronics products on the Internet. The company has a headquarters site and one satellite sales office. You have been hired as the database administrator, and the company wants you to change the architecture of the Fabrikam ecommerce site to optimize performance and reduce downtime while keeping capital expenditures to a minimum. To help with the solution, Fabrikam has decided to use cloud resources as well as on-premise servers. Physical Locations All of the corporate executives, product managers, and support staff are stationed at the headquarters office. Half of the sales force works at this location. There is also a satellite sales office. The other half of the sales force works at the satellite office in order to have sales people closer to clients in that area. Only sales people work at the satellite location. Problem Statement To be successful, Fabrikam needs a website that is fast and has a high degree of system uptime. The current system operates on a single server and the company is not happy with the single point of failure this presents. The current nightly backups have been failing due to insufficient space on the available drives and manual drive cleanup often needing to happen to get past the errors. Additional space will not be made available for backups on the HQ or satellite servers. During your investigation, you discover that the sales force reports are causing significant contention. Configuration Windows Logins The network administrators have set up Windows groups to make it easier to manage security. Users may belong to more than one group depending on their role. The groups have been set up as shown in the following table: Server Configuration The IT department has configured two physical servers with Microsoft Windows Server 2012 R2 and SQL Server 2014 Enterprise Edition and one Windows Azure Server. There are two tiers of storage available for use by database files only a fast tier and a slower tier. Currently the data and log files are stored on the fast tier of storage only. If a possible use case exists, management would like to utilize the slower tier storage for data files. The servers are configured as shown in the following table: Database Currently all information is stored in a single database called ProdDB, created with the following script: The Product table is in the

Production schema owned by the ProductionStaff Windows group. It is the main table in the system so access to information in the Product table should be as fast as possible. The columns in the Product table are defined as shown in the following table:

The SalesOrderDetail table holds the details about each sale. It is in the Sales schema owned by the SalesStaff Windows group. This table is constantly being updated, inserted into, and read. The columns in the SalesOrderDetail table are defined as shown in the following table:

Database Issues The current database does not perform well. Additionally, a recent disk problem caused the system to go down, resulting in lost sales revenue. In reviewing the current system, you found that there are no automated maintenance procedures. The database is severely fragmented, and everyone has read and write access.

Requirements Database The database should be configured to maximize uptime and to ensure that very little data is lost in the event of a server failure. To help with performance, the database needs to be modified so that it can support in-memory data, specifically for the Product table, which the CIO has indicated should be a memory-optimized table. The auto-update statistics option is set off on this database. Only product managers are allowed to add products or to make changes to the name, description, price, cost, and supplier. The changes are made in an internal database and pushed to the Product table in ProdDB during system maintenance time. Product managers and others working at the headquarters location also should be able to generate reports that include supplier and cost information.

Customer data access Customers access the company's website to order products, so they must be able to read product information such as name, description, and price from the Product table. When customers place orders, stored procedures called by the website update product quantity-on-hand values. This means the product table is constantly updated at random times.

Customer support data access Customer support representatives need to be able to view and not update or change product information. Management does not want the customer support representatives to be able to see the product cost or any supplier information.

Sales force data access Sales people at both the headquarters office and the satellite office must generate reports that read from the Product and SalesOrderDetail tables. No updates or inserts are ever made by sales people. These reports are run at random times and there can be no reporting downtime to refresh the data set except during the monthly maintenance window. The reports that run from the satellite office are process intensive queries with large data sets. Regardless of which office runs a sales force report, the SalesOrderDetail table should only return valid, committed order data; any orders not yet committed should be ignored.

Historical Data The system should keep historical information about customers who access the site so that sales people can see how frequently customers log in and how long they stay on the site. The information should be stored in a table called Customer Access. Supporting this requirement should have minimal impact on production website performance.

Backups The recovery strategy for Fabrikam needs to include the ability to do point in time restores and minimize the risk of data loss by performing transaction log backups every 15 minutes.

Database Maintenance The company has defined a maintenance window every month when the server can be unavailable. Any maintenance functions that require exclusive access should be accomplished during that window.

Project milestones completed

- * Revoked all existing read and write access to the database, leaving the schema ownership in place.
- * Configured an Azure storage container secured with the storage account name MyStorageAccount with the primary access key StorageAccountKey on the cloud file server.
- * SQL Server 2014 has been configured on the satellite server and is ready for use.
- * On each database server, the fast storage has been assigned to drive letter F:, and the slow storage has been assigned to drive letter D:.

You need to create the CustomerAccess table to support the reporting and performance requirements. Develop the solution by selecting and arranging the required code blocks in the correct order. You may not need all of the code blocks.

Answer: Explanation: Explanation

NEW QUESTION: 2 What incorporate a detection system, which can eliminate concerns over water damage and false activation of the system?
A. Post-action system
B. Exposure
C. Discovery

systemD. Pre-action system**Answer: D**

NEW QUESTION: 3You need to secure the network traffic and isolate the Azure SQL Database network traffic.Which configuration should you use? To answer, select the appropriate options in the answer area.**Answer:** Explanation:ExplanationBox 1: Azure VPN GatewayScenario: You must isolate network traffic from the internet to the Azure SQL Database.A VPN gateway is a specific type of virtual network gateway that is used to send encrypted traffic between an Azure virtual network and an on-premises location over the public Internet. You can also use a VPN gateway to send encrypted traffic between Azure virtual networks over the Microsoft network.Box 2: Virtual Network Service EndpointVirtual network rules are one firewall security feature that controls whether your Azure SQL Database or SQL Data Warehouse server accepts communications that are sent from particular subnets in virtual networks. To create a virtual network rule, there must first be a virtual network service endpoint for the rule to reference.Scenario:The Azure SQL Database must have a direct connection from the virtual network.References:
