**NEW QUESTION: 2** An organization having a number of offices across a wide geographical area has developed a disaster recovery plan. Using actual resources, which of the following is the MOST cost-effective test of the disaster recovery plan?  
**A.** Preparedness test  
**B.** Full operational test  
**C.** Paper test  
**D.** Regression test  
**Answer: A**  
**Explanation:** A preparedness test is performed by each local office/area to test the adequacy of the preparedness of local operations for disaster recovery. A paper test is a structured walk-through of the disaster recovery plan and should be conducted before a preparedness test. A full operational test is conducted after the paper and preparedness test. A regression test is not a disaster recovery planning (DRP) test and is used in software maintenance.
