AUTO_CREATE_STATISTICSをONにしますB. 更新統計C. 統計の作成D. sys.index_columns

Answer: AExplanation:ExplanationAUTO_UPDATE_STATISTICS { ON | OFF }ON specifies that the query optimizer updates statistics when they are used by a query and when they might be out-of-date. Statistics become out-of-date after insert, update, delete, or merge operations change the data distribution in the table or indexed view. The query optimizer determines when statistics might be out-of-date by counting the number of data modifications since the last statistics update and comparing the number of modifications to a threshold. The threshold is based on the number of rows in the table or indexed view.References:
