NEW QUESTION: 1Enterprise Architecture consists of Business Architecture, Application Architecture, Information, Architecture and Technical Architecture (BAIT). Which statement best describes Oracle Reference Architecture (ORA) in the context of BAIT?**A.** ORA addresses all four (Business, Application, Information, and Technical) equally.**B.** ORA has content applicable to Information Architecture only.**C.** ORA has content applicable to the Technical Architecture only.**D.** ORA is primarily focused on the Business Architecture, with some content on the other three aspects of BAIT**E.** ORA is primarily focused on the information Architecture, with some limited content on the other three aspects of BAIT.**F.** ORA is primarily focused on the Technical Architecture, with some content on the other three aspects- of BAIT.**Answer: A****Explanation:** Oracle Reference Architecture(ORA) defines a detailed and consistent reference architecture for developing and integrating solutions based on current technologies from Oracle and other vendors. The reference architecture offers architecture views, principles, and guidance based on recommendations from technical experts across Oracle. It covers a broad spectrum of concerns pertaining to technology architecture, including middleware, database, hardware, processes, and services.

NEW QUESTION: 2A company has an application running on Amazon EC2 instances in a private subnet. The application needs to store and retrieve data in Amazon S3 To reduce costs, the company wants to configure its AWS resources in a cost-effective manner How should the company accomplish this?**A.** Deploy an S3 gateway endpoint to access the S3 buckets**B.** Deploy AWS Storage Gateway to access the S3 buckets**C.** Deploy a NAT gateway to access the S3 buckets**D.** Deploy an S3 interface endpoint to access the S3 buckets.**Answer: B**

NEW QUESTION: 3You need to implement the ViewsRunLog_CalculatePace.cshtml partial view from ViewsRunlog GetLog.cshtml to display the runner's average mile pace.How should you implement the view? (To answer, drag the appropriate code segments to the correct location or locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)**Answer: Explanation:**

NEW QUESTION: 4A site wishes to perform source address translation on packets arriving from the Internet for clients using some pools but not others. The determination is not based on the client's IP address, but on the pool they are load balanced to. What could best accomplish this goal.**A.** For each virtual server, regardless their default load balancing pools, association with SNAT pools could vary dependent upon need.**B.** A SNAT for all addresses could be defined, and then disable the SNAT processing for select pools.**C.** The decision to perform source address translation is always based on a client's address (or network). Thus, this goal cannot be achieved.**D.** The decision to perform source address translation is always based on VLAN. Thus, the goal cannot be achieved.**Answer: B**
