NEW QUESTION: 1You are a technical consultant designing a solution for an online retail company. The project vision is to deploy a hybrid cloud, with the internal team developing the website on internal infrastructure and migrating production-ready applications to a hosting provider. The project is expected to ease deployment and require less infrastructure capital expenditure-without lowering application quality.Which of the following is a risk to the project?
A. The hosting provider outsources the platform support to the platform vendor.**B.** The solution must adhere to ISO 27001.**C.** Change control of the hosting vCloud platform is not under full control of the internal business.**D.** The applications to be deployed on the production hosts are not fully developed, although a beta exists.**Answer: C**
Explanation:The technical design process enables the platform designer to work in a methodical way and with others who have similar objectives. A risk is that a project item could potentially prevent the vision or aspects of it (requirements) from being created. Chapter 1, The Technical Design Process
