NEW QUESTION: 1The IT director has charged the company helpdesk with sanitizing fixed and removable media. The helpdesk manager has written a new procedure to be followed by the helpdesk staff. This procedure includes the current standard to be used for data sanitization, as well as the location of physical degaussing tools. In which of the following cases should the helpdesk staff use the new procedure? (Select THREE).**A.** When media fails or is unusable**B.** Before asset repurposing**C.** During the data classification process**D.** When installing new printers**E.** After the media has been disposed of**F.** While reviewing the risk assessment**G.** During asset disposal**H.** While deploying new assets**Answer: A,B,G****Explanation:**Data sanitization using physical degaussing tools is the use of magnets to completely destroy data on a storage device. This is performed to ensure confidentiality of data, that is, that the data stored on the device cannot be recovered by unauthorized users. This should be performed when disposing of a storage device or when repurposing a storage device. When media fails or is unreadable, it would be disposed and thus should also be sanitized.
