Explanation:Explanation Azure Active Directory (Azure AD) has an Application Proxy service that enables users to access on-premises applications by signing in with their Azure AD account. The application proxy enables you to take advantage of Azure AD security features like Conditional Access and Multi-Factor Authentication. To use Application Proxy, install a connector on each Windows server you're using with the Application Proxy service. The connector is an agent that manages the outbound connection from the on-premises application servers to Application Proxy in Azure AD. Reference:
