NEW QUESTION: 2A mother brings her 1-year-old child to the clinic. The child has no record of previous immunizations, and the mother confirms the child has not been immunized. Teaching by the nurse should include which of the following?**A.** This child is at increased risk for reaction to the vaccines, when they are started.**B.** If a primary series of immunizations is interrupted, the series must be restarted.**C.** Immunizations may be started at any age.**D.** The recommended immunization schedule must be followed exactly.**Answer: C**Explanation:While a recommended immunization schedule exists, immunizations may be started at any age. An interrupted series may be continued and need not be restarted. There is no increased risk for reaction to vaccines due to delay.Health Promotion and Maintenance

NEW QUESTION: 3You need to recommend a solution to meet the device management requirements.What should you include in the recommendation? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.

Answer: Explanation:ExplanationReference:

<https://github.com/MicrosoftDocs/IntuneDocs/blob/master/intune/app-protection-policy.md>
<https://docs.microsoft.com/en-us/azure/information-protection/configure-usage-rights#do-not-forward-option-for>Topic 1, Litware incThis is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.To start the case studyTo display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Existing Environment Current Business Model The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11:00 to 22:00.Litware has a Microsoft System Center 2012 R2 Configuration Manager deployment. During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.Current EnvironmentThe network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.Litware has the computers shown in the following table.The

development department uses projects in Azure DevOps to build applications. Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to different contractor. Currently, the computers are re-provisioned manually by the IT department.

Problem Statements

Litware identifies the following issues on the network:

- * Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)
- * Management suspects that the source code for the proprietary applications in Azure DevOps is being shared externally.
- * Re-provisioning the sales department computers is too time consuming.

Business Goals

Litware plans to transition to co-management for all the company-owned Windows 10 computers. Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements

Litware identifies the following device management requirements:

- * Prevent the sales department employees from forwarding email that contains bank account information.
- * Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.
- * Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements

Litware identifies the following technical requirements for the planned deployment:

- * Re-provision the sales department computers by using Windows AutoPilot.
- * Ensure that the projects in Azure DevOps can be accessed from the corporate network only.
- * Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.
- * Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.
