NEW QUESTION: 1 Code changes are compiled and placed in a change folder by the developer. An implementation team migrates changes to production from the change folder. Which of the following BEST indicates separation of duties is in place during the migration process? **A.** A second individual performs code review before the change is released to production. **B.** The implementation team does not have access to change the source code. **C.** The developer approves changes prior to moving them to the change folder. **D.** The implementation team does not have experience writing code. **Answer: D**

NEW QUESTION: 2 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your network contains an Active Directory domain named contoso.com. The domain contains a DHCP server named Server1. All client computers run Windows 10 and are configured as DHCP clients. Your helpdesk received calls today from users who failed to access the network from their Windows 10 computer. You open the DHCP console as shown in the exhibit. (Click the Exhibit button.) You need to ensure that all of the Windows 10 computers can receive a DHCP lease. Solution: You start the DHCP Server service. Does this meet the goal? **A.** Yes **B.** No **Answer: B** Explanation: Explanation [https://technet.microsoft.com/en-us/library/dd183581\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/dd183581(v=ws.10).aspx)

NEW QUESTION: 3 You have a server named Server1 that runs Windows Server 2016. Server1 has the Web Application Proxy role service installed. You are publishing an application named App1 that will use Integrated Windows authentication as shown in the following graphic. Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. **Answer:** Explanation: Explanation Publish an Integrated Windows authenticated-based Application for Web Browser Clients Step 1: (configure the Backend server SPN - see first bulleted item below) Before you begin, make sure that you have done the following: Step 2: <http://server2.contoso.com/publish/app1> Use the same URL as the backend server URL. Web Application Proxy can translate host names in URLs, but cannot

translate path names. Therefore, you can enter different host names, but you must enter the same path name. For example, you can enter an external URL of <https://apps.contoso.com/app1/> and a backend server URL of <http://app-server/app1/>. However, you cannot enter an external URL of <https://apps.contoso.com/app1/> and a backend server URL of <https://apps.contoso.com/internal-app1/>.References: [https://technet.microsoft.com/en-us/library/dn383640\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/dn383640(v=ws.11).aspx)

NEW QUESTION: 4A corporation is implementing Oracle Fusion Workforce Compensation and has set up an individual compensation plan for a contribution. This contribution has to be approved by the four members in parallel. Identify the correct option regarding parallel approvals. (Choose the best answer.)**A.** A parallel approval option is not available and any approval configured is always sequential.**B.** Parallel approvals are not fully supported, but notifications can be sent to all members in parallel using the list builder resource option and configuring Application Role. However, the first person who claims the notification can approve it, and this ends the process and the other members lose control over the approval of the notification.**C.** Parallel approvals are supported by configuring the Application role option in the Resource list builder. Only after all the approvers approve will the process end.**D.** Parallel approvals are supported and can be configured using Static approval groups. Only after all the approvers approve will the process end.**Answer: D**
