Our SAFe-POPM real exam applies to all types of candidates, It will help you assess your current preparation level so you can improve your preparation for the final Scrum SAFe-POPM exam.

NEW QUESTION: 1 A company creates an API and makes it accessible on an Azure website. External partners use the API occasionally. The website uses the Standard web hosting plan. Partners report that the first API call in a sequence of API calls occasionally takes longer than expected to run. Subsequent API calls consistently perform as expected. You need to ensure that all API calls perform consistently. What should you do?
A. Enable Always On support.
B. Add a trigger to the web.config file for the website that causes the website to recycle periodically.
C. Configure the website to use the Basic web hosting plan.
D. Configure the website to automatically scale.
Answer: A
Explanation: Explanation/Reference: Explanation: By default, web apps are unloaded if they are idle for some period of time. This lets the system conserve resources. In Basic or Standard mode, you can enable Always On to keep the app loaded all the time. If your app runs continuous WebJobs or runs WebJobs triggered using a CRON expression, you should enable Always On, or the web jobs may not run reliably. References: <https://docs.microsoft.com/en-us/azure/app-service-web/web-sites-configure>

NEW QUESTION: 2 A company has requested that a plan for Auto Deploy be built using VMware-recommended best practices for networking. Which two considerations adhere to VMware-recommended networking best practices for Auto Deploy? (Choose two.)
A. Using VLANs on the management network as it offers increased performance while hosts are booting.
B. Using IPv6 as Auto Deploy will be able to boot hosts with a legacy BIOS and UEFI.
C. Using DHCP reservations for address allocations because providing fixed IP addresses through host customization is not recommended.
D. Using IPv4 as Auto Deploy will be able to boot hosts with a legacy BIOS.
E. Using DHCP reservations for address allocations because providing fixed IP addresses through host customization is not supported.
Answer: C, D
Explanation: Explanation PXE booting with legacy BIOS firmware is possible only over IPv4. PXE booting with UEFI firmware is possible with either IPv4 or IPv6. Use DHCP reservations for address allocation. Fixed IP addresses are supported by the host customization mechanism, but providing input for each host is not recommended

NEW QUESTION: 3 A technician is troubleshooting a reported wireless connectivity problem with a user's laptop. The 802.11a access point is located in one of the corners of a square office with 100 meter walls, while the user's office is on the opposite corner. The user's laptop is able to wirelessly pair with a printer located in the middle of the office and the user can print in ad hoc mode. Which of the following is the reason the user is unable to connect to the Internet?
A.

802.11a only supports ad hoc mode.**B.** The laptop NIC is faulty.**C.** RF signal is not received from the WAP.**D.** The printer is not connected to the WAP.**Answer: C**

NEW QUESTION: 4View the Exhibit and examine the structure of the products table.All products have a list price.You issue the following command to display the total price of each product after a discount of 25% and a tax of 15% are applied on it. Freight charges of \$100 have to be applied to all the products.What would be the outcome if all the parentheses are removed from the above statement?**A.** The total price value would be lower than the correct value.**B.** The total price value would be higher than the correct value.**C.** It produces a syntax error.**D.** The result remains unchanged.**Answer: D**
