NEW QUESTION: 2You are developing an app that manages users for a video game. You plan to store the region, email address, and phone number for the player. Some players may not have a phone number. The player's region will be used to load-balance data. Data for the app must be stored in Azure Table Storage. You need to develop code to retrieve data for an individual player. How should you complete the code? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation:Explanation
Box 1: regionThe player's region will be used to load-balance data. Choosing the PartitionKey. The core of any table's design is based on its scalability, the queries used to access it, and storage operation requirements. The PartitionKey values you choose will dictate how a table will be partitioned and the type of queries that can be used. Storage operations, in particular inserts, can also affect your choice of PartitionKey values. Box 2: emailNot phone number some players may not have a phone number. Box 3: CloudTableBox 4 : TableOperation query =..Box 5: TableResultReferences:
