Aftersales services.

NEW QUESTION: 1A user receives the following message when attempting to sign in to <https://myapps.microsoft.com>: "Your sign-in was blocked. We've detected something unusual about this sign-in. For example, you might be signing in from a new location, device, or app. Before you can continue, we need to verify your identity. Please contact your admin." Which configuration prevents the users from signing in?
A. Security & Compliance data loss prevention (DLP) policies
B. Microsoft Azure Active Directory (Azure AD) Identity Protection policies
C. Microsoft Azure Active Directory (Azure AD) conditional access policies
D. Security & Compliance supervision policies
Answer: C
Explanation: ExplanationThe user is being blocked due to a 'risky sign-in'. This can be caused by the user logging in from a device that hasn't been used to sign in before or from an unknown location. Integration with Azure AD Identity Protection allows Conditional Access policies to identify risky sign-in behavior. Policies can then force users to perform password changes or multi-factor authentication to reduce their risk level or be blocked from access until an administrator takes manual action.
