If you do, you can try Media-Cloud-Consultant exam materials of us, we will help you obtain the certification with the least time, All these versions of our Media-Cloud-Consultant exam braindumps are popular and priced cheap with high quality and accuracy rate.

NEW QUESTION: 1What is the purpose of the switchport command?Switch(config-if)# switchport port-security maximum 1Switch(config-if)# switchport port-security mac-address 0018.DE8B.4BF8**A.** It informs the switch that traffic destined for MAC address 0018.DE8B.4BF8 should only be sent to the port that is being configured.**B.** It will act like an access list and the port will filter packets that have a source or destination MAC of 0018.DE8B.4BF8.**C.** The switch will shut down the port of any traffic with source MAC address of 0018.DE8B.4BF8.**D.** It ensures that only the device with the MAC address 0018.DE8B.4BF8 will be able to connect to the port that is being configured.**Answer: D**Explanation:The first command configures the maximum number of secure MAC addresses on a port to one. The next command specifies that MAC addresses that are allowed with port security; in this case it is just the one single device MAC. If any other device connects on that port the port will be shut down by the port security feature.

NEW QUESTION: 2Which statement about communication over failover interfaces is true?**A.** All information that is sent over the failover interface is sent as clear text, but the stateful failover link is encrypted by default.**B.** All information that is sent over the failover and stateful failover interfaces is encrypted by default.**C.** All information that is sent over the failover and stateful failover interfaces is sent as clear text by default.**D.** User names, passwords, and preshared keys are encrypted by default when they are sent over the failover and stateful failover interfaces, but other information is sent as clear text.**Answer: C**Explanation:All information sent over the failover and Stateful Failover links is sent in clear text unless you secure the communication with a failover key. If the security appliance is used to terminate VPN tunnels, this information includes any usernames, passwords and preshared keys used for establishing the tunnels. Transmitting this sensitive data in clear text could pose a significant security risk. We recommend securing the failover communication with a failover key if you are using the security appliance to terminate VPN tunnels.Source:
