**NEW QUESTION: 1** Many organizations create network maps of their network system to visualize the network and understand the relationship between the end devices and the transport layer that provide services. Which of the following are the techniques used for network mapping by large organizations? Each correct answer represents a complete solution. Choose three. **A.** SNMP-based approaches **B.** Route analytics **C.** Active Probing **D.** Packet crafting  
**Answer: A,B,C**

**NEW QUESTION: 2** Departmentalization is a common form of business integration. Grouping together all related jobs, activities, and processes for a given business objective into a major organizational subunit is an example of: **A.** Product-service departmentalization. **B.** Customer classification departmentalization. **C.** Geographic location departmentalization. **D.** Functional departmentalization. **Answer: A**  
**Explanation:** Departmentation by product or service is growing in importance for multiline, large-scale enterprises and is an outgrowth of functional departmentation. The result is that productservice subunits may be treated as separate businesses with a high degree of autonomy. Managers must therefore have a broad perspective, not a merely functional orientation.
