NEW QUESTION: 1 A German data subject was the victim of an embarrassing prank 20 years ago. A newspaper website published an article about the prank at the time, and the article is still available on the newspaper's website. Unfortunately, the prank is the top search result when a user searches on the victim's name. The data subject requests that SearchCo delist this result. SearchCo agrees, and instructs its technology team to avoid scanning or indexing the article. What else must SearchCo do?**A.** Prevent the article from being listed in search results no matter what search terms are entered into the search engine.**B.** Notify the newspaper that its article it is delisting the article.**C.** Fully erase the URL to the content, as opposed to delist which is mainly based on data subject's name.**D.** Identify other controllers who are processing the same information and inform them of the delisting request.**Answer: B**

NEW QUESTION: 2 Your network contains two servers named Server1 and Server2. Both servers run Windows Server 2012 R2 and have the DNS Server server role installed. Server1 hosts a primary zone for contoso.com. Server2 hosts a secondary zone for contoso.com. The zone is not configured to notify secondary servers of changes automatically. You update several records on Server1. You need to force the replication of the contoso.com zone records from Server1 to Server2. What should you do from Server2?**A.** Right-click Server2 and click Refresh.**B.** Right-click the contoso.com zone and click Transfer from Master.**C.** Right-click the contoso.com zone and click Reload.**D.** Right-click Server2 and click Update Server Data Files.**Answer: B**
Explanation: Explanation/Reference: Explanation: Initiates zone transfer from secondary server Open DNS; In the console tree, right-click the applicable zone and click Transfer from master.
