How to left a deep impression on your employer?

NEW QUESTION: 1 Access roles allow the firewall administrator to configure network access according to:
A. users and user groups
B. a combination of computer groups and network
C. remote access clients
D. all of above
Answer: D
Explanation: Explanation/Reference: Explanation:
To create an access role:
1. Select Users and Administrators in the Objects Tree.
2. Right-click Access Roles > New Access Role. The Access Role window opens.
3. Enter a Name and Comment (optional) for the access role.
4. In the Networks tab, select one of these:
Any network
Specific networks - Click the plus sign and select a network. Your selection is shown in the Networks node in the Role Preview pane.
5. In the Users tab, select one of these:
Any user
All identified users - Includes users identified by a supported authentication method (internal users, AD users or LDAP users).
Specific users - Click the plus sign. A window opens. You can search for Active Directory entries or select them from the list.
6. In the Machines tab, select one of these:
Any machine
All identified machines - Includes machines identified by a supported authentication method (AD).
Specific machines - Click the plus sign. You can search for AD entries or select them from the list.
7. Optional: For computers that use Full Identity Agents, from the Machines tab select Enforce IP spoofing protection.
8. Click OK. The access role is added to the Users and Administrators tree.
