NEW QUESTION: 3You have been given the task to define multiple AWS Data Pipeline schedules for different activities in the same pipeline. Which of the following would successfully accomplish this task?**A. Creating multiple pipeline definition filesB. Defining multiple schedule objects in your pipeline definition file and associating the desired schedule to the correct activity via its schedule fieldC. Defining multiple schedule objects in the schedule fieldD. Defining multiple pipeline definitions in your schedule objects file and associating the desired schedule to the correct activity via its schedule field****Answer: B**Explanation:To define multiple schedules for different activities in the same pipeline, in AWS Data Pipeline, you should define multiple schedule objects in your pipeline definition file and associate the desired schedule to the correct activity via its schedule field. As an example of this, it could allow you to define a

pipeline in which log files are stored in Amazon S3 each hour to drive generation of an aggregate report once a day. Reference: <https://aws.amazon.com/datapipeline/faqs/>
